## **MWTC holds groundbreaking for additional electronic classrooms, labs**

A groundbreaking ceremony will be held Tuesday, Jan. 20, at 10:30 a.m., for an addition to the Mine Warfare Training Center, aboard Naval Station Ingleside.

The \$4.5 million project will add about 21,000 square feet of electronic classrooms and labs where students will gain weapons system training and learn about the new generation of organic mine warfare. The project is a fast-track joint venture with architects Benton, Martin and Solka and builders STC Constructors. It is scheduled to be completed by October 2004.
